Re: Letter of Recommendation for The Medicus Firm

To Whom It May Concern:

I have worked with The Medicus Firm since 2008 concentrating on a rural family practice opportunity with very specific candidate parameters. I was teamed up with Mark Lozano from The Medicus Firm. I have been very impressed with Mark during this search and would consider him to be very competent and trustworthy. I have also been pleased with the follow-up I've received regarding the search progress. Information was so detailed that I received cold call logs with names, addresses, notes and color coding indicating the potential level of interest. When interested candidates were identified, Mark was very thorough in his screening process and presented me with ample information about the candidate.

After a long search, for the right candidate, we placed a husband and wife (both primary care physicians) with our hospital and we are looking forward to their transition to our community this summer!

I would strongly recommend The Medicus Firm to any hospital who has a challenging recruitment need. My experience has been great!
