To Whom It May Concern:

This was my first experience working with The Medicus Firm and they delivered. Because we are a small remote community, recruitment has been a challenge and thus I was hesitant to put any resources into a dedicated search.

I was impressed with The Medicus Firm's straight-forward communication and honesty associated with the difficulty of recruiting physicians in today's market. The Recruiting Principal with whom I worked with was knowledgeable and made sure the candidates presented were knowledgeable of the opportunity prior to submitting to us for consideration. They committed to us that they would put forth all the resources needed to be successful on the search and did just that, filling the search in approximately six months.

Mission

To provide quality healthcare by maintaining an environment that is positive and caring for the patients, staff and community we serve, in a financially responsible manner. V

I will continue to work with The Medicus Firm if the need arises and would recommend their work to others.

Sincerely,

John Halfen
Administrator
