To whom it may concern:

Peach Tree Health is a non-profit, Community Health Center located about an hour north of Sacramento in Marysville, CA . Our patient base is predominantly the underserved population who require local access to high quality primary health care by well-trained health care professionals. In the Fall of 2012 after several months of failure from my previous recruiting partnerships, I enlisted the services of The Medicus Firm to assist me in recruiting both a Medical Director as well as staff clinicians.

It is a very challenging market right now for Primary Care Physicians, especially in the rural areas. I have worked with several recruiters over the years with mixed results and we have been fortunate to have partnered with The Medicus Firm on this project. I could not have been more pleased with the assistance of the Recruiting Principals. They never pushed a candidate on me and they listened as well as advised us on what they are seeing in the market place.

As with any business relationship, communication is the key to success. So many Recruiters I've dealt with in the past had too many projects to manage at one time or there was a lack of communication from them. The Medicus Firm only works with a hand full of projects at a time so we were able to have the attention of our recruiter and never felt like we were at the bottom of the pecking order. Our Recruiting Principal keeps me well informed every step of the process. When he committed to doing something, he always delivered and followed up to ensure the outcome was as I expected.

The candidates were well informed of our opportunity, they understood both the positives and the potential negatives and were prepared to make a decision after the interview. I am extremely pleased with the work The Medicus Firm has done for us and I will continue to work with The Medicus Firm as future needs arise and I would strongly recommend them when choosing a physician recruiting firm.

Sincerely,
