

December 11, 2009

We engaged The Medicus Firm to help us with a number of searches and were very pleased with the results.

We had the opportunity to work with them on two successful placements so far. Both were very different. They recruited an ENT for us for a solo opportunity and identified the candidate we subsequently hired within 45 days of commencing the search. The radiologist they recruited for us was placed after an extended search during which our communication with the firm and the consistency of effort never wavered. Both searches were difficult to fill for different reasons, but my consultant did a great job of communicating with us and the result was very positive.

I recommend The Medicus Firm and the work they do to anyone looking to recruit physicians.

Sincerely,

Wendy Colvin
