

Mid-Valley Hospital

September 30, 2009

To Whom it May Concern:

We began working with The Medicus Firm in mid-September 2008, when our need to recruit a general surgeon came to a head. Our recruiting Principal visited the community, met with other physicians in the area and helped us formulate a plan for a successful search.

In very short order, our recruiter submitted 4 candidates for our review, and we chose to bring the best candidate in for an onsite visit. He helped us to arrange the visit and it went extremely well.

We chose to extend an offer to the candidate and had the agreement back in mid-December. The entire search process took just 82 days!

I really appreciated Steve's diligence in working with us, his understanding of the physician search industry and his attention to detail. We have since engaged them on additional searches and I continue to be optimistic about the work they are doing. I recommend The Medicus Firm to any hospital or group looking to add additional staff.

Sincerely,

Randy Coffell
