From the time that our recruiters visited with us on-site, it was obvious that they had a clear understanding of what it would take to successfully recruit to a very remote Indian Health reservation. Because we are a small rural community looking for that "needle in the haystack" provider, recruitment has been a challenge. Our recruiters understood the difficulties associated with taking on the search; however they did not let that hinder their ability to find us 2 physicians that are both mission minded and clinically brilliant.

We kicked off the search in June – within 60 days we had 3 candidates and two offers out. For the first time, we were now in the position of having more qualified candidates than open positions and it's all thanks to The Medicus Firm.

My recruiters not only provided us with candidates but multiple qualified candidates for each opportunity. The candidates had the background, training and motivation necessary to be successful in our community. They were well informed of our opportunity; they understood both the positives and potential challenges and were prepared to make a decision right after the interview. Most importantly they were already licensed in our state and able to start within weeks.

I am extremely pleased with the work The Medicus Firm has done for us, they have filled all of our open slots, and although their work here is done, I will continue to work with the Medicus Firm as future needs arise.

The Medicus firm has proven to be a valuable partner to Red Cliff Community health center; it is because of this I offer my strongest recommendation. The professionalism, the maturity and the high level of communication made this partnership a real success. Thank You! I could not have chosen a better firm.

Sincerely,

Elizabeth Marceux
Assistant Health Director
Red Cliff Community Health Center

Caretakers of the medicine, protectors of your health
